ASSISI New! LOOP[®] circle of care

NOW STOCKED IN CANADA!

- Immediate, Hassle-free Order Fulfillment
- No Importing Headaches or Costs

INNOVATIVE TECHNOLOGIES FOR ANIMAL REHABILITATION & NON - INVASIVE PAIN MANAGEMENT

FOR PAIN, INFLAMMATION, WOUND CARE AND ACCELERATED HEALING

Features

- Non-invasive and non-pharmacological
- Excellent for pets that do not tolerate NSAIDS
- 150 fifteen minute treatments
- Costs as little as \$2.50 per treatment
- Applicator comes in 2 sizes — 20 cm and 10 cm
- Weighs only 2 ounces
- Easy to administer
- Comfortable applicator is easy to position for therapy
- Treats directly through wraps, dressings and casts
- Can be used on any species
- Can be easily administered by the client in the home or on the farm
- Painless therapy for patients
- FDA cleared
- Made in USA- Stocked and Distributed in Canada

Mechanism of action identified

- Targets Calcium/Calmodulin binding (Ca²⁺/CaM)

Mechanism of action demonstrated

- Lab experiments using inhibitors conclusively confirm mechanism of action of tPEMF

Targeted signals modulate anti-inflammatory & growth factor cascades

PEMF Voltage dependent

Ca²⁺ + CaM → Ca²⁺CaM

PEMF increases Ca²⁺ binding to CaM in milliseconds

Ca²⁺CaM + cNOS → NO

Ca²⁺CaM binds to cNOS, catalyzes NO release instantaneously increasing blood and lymph flow.

Pain and Edema decrease in seconds

NO → cGMP → Growth Factors

FGF-2/VEGF

TNF-α

TGF-B

Angiogenesis (hours/days)

Collagen/Granulation (days)

Remodeling (days/weeks)

MOBILE DIAGNOSTIC

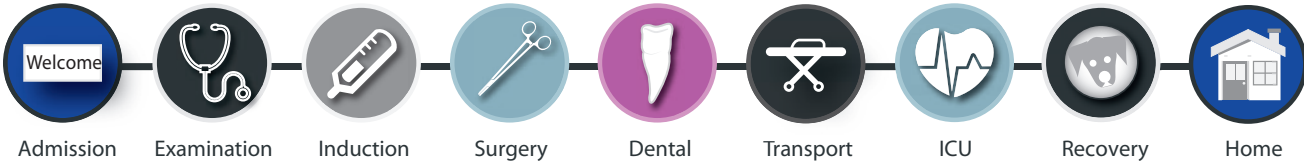

SENTIER VETCORDER

Reach New levels of Care, Connection & Convenience

Visibly higher quality

Clients appreciate practices that provide the highest standards of care and technology. The Vetcorder provides a cost effective way to deliver these standards.

Monitor anywhere, anytime

Expand your practice beyond the four walls of your hospital. Use the Vetcorder in surgery, in your mobile practice or send it home with your client and receive regular vital signs updates.

Do more to monitor every pet's recovery

The Vetcorder offers an alternative to outdated, high cost, and bulky monitors. As a portable smart monitor, it stays with your patient from admission through discharge.

Met standards of ISO 80601-2-61

PHYSIG-TECH

An underwater treadmill will convince your customers, too

Like humans, dogs suffer from the problems of modern life. Excess weight, inactivity and ageing as well as illness, injuries or the adverse effects of breeding can cause them pain when they move.

In water, muscles, tendons, bones and joints are freed from the burden of body weight. Moving can become painless. At the same time, water resistance makes the training much more effective than »on land«. The temperature provides another therapeutic benefit: Warm water relaxes breathing and skeletal muscles, while cool water protects the circulation against overheating.

An underwater treadmill makes training exceptionally safe for the dog. Sudden turns or stops are ruled out. Furthermore, running is a much better option than swimming. It trains precisely those functions that a dog actually needs to move.

As a physiotherapy treatment method, hydrotherapy in the underwater treadmill is therefore the ideal supplement to classic veterinary therapies in the area of orthopaedics and neurology.

STERILIZATION & INSTRUMENT PREPARATION

Bringing you the best options for all your Instrument cleaning and Sterilization.
