Digital **Upgrade**

Upgrade your existing X-ray machine with the 17"x17" Digital Detector and you will have no need to ever rotate the detector when imaging the largest breeds.

With the 14"x17" Digital Detector, you retain all the flexibility you have now with film in any companion or mixed animal practice.

The VIVIX HD Digital Detector acquires and displays images in seconds. With our new Advanced Veterinary Image Processing (AVIP) software you get a high resolution image needing no adjustment. The AVIP software is adjusted to your specific preference for image viewing. With images appearing in seconds you can quickly position, take the exposure(s) and complete the study in record time.

Image Field Size
17" x 17"
14" x 17"

Spacial Resolution
3.5 lp/mm

Image Cycle Time
4.0 sec.

Scintillator
Cesium or Gadolinium

Number of Bits
14 BIT A/D 16 BIT
Digital Output

Shades of Gray
4,096 (16,384)

Digital **Upgrade**

Upgrade your Sedecal X-ray table to Digital and you will get more than Digital Images.

You will be upgraded to a fully integrated system with your existing Sedecal X-ray generator (2004 and newer*) and new acquisition PC. With your choice of either detector, 17" x 17" or 14" x 17" and we will also include upgrading your membrane console to the **NEW 17" Single Touch II Monitor System.**

The Single Touch II is the only monitor needed in the Radiology area. Selection of patient, body part to image and view as well as acquired image are displayed on this convenient "heads up" touch screen monitor. Learn more at www.vetray.com
